

“Proteus was primarily brought in to enable us to achieve PCI compliance, but its uses beyond this remit were evident from the start. The ability of the solution to adapt to the needs of the entire organization is unmatched.”

Stephen Thornber, Chief Information Security Officer,
bet365

“Proteus is one of the only products on the market that ties everything together. The fact that Proteus had been built for purpose rather than adapted to suit was a big draw and, ultimately, it meant we selected Proteus as Bis-Web’s GRC platform.”

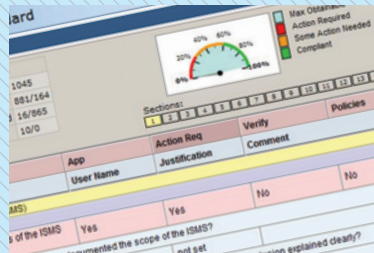

Paul Alleway, Information Security Manager
and Systems Administrator, Bis-Web Group

In addition to the Proteus software, we've developed a range of services to support your governance, risk and compliance (GRC) needs. From training and consultancy to standards and compliance, our systems can be implemented easily because they are designed to fit your organization - whatever your specific needs.

Training

Proteus Enterprise is extremely powerful software when used to its full potential, that's why we do everything we can to help you make the most of the platform - delivering training that ensures you harness its full capabilities.

Whether you require group training courses to make sure all your staff are familiar with Proteus, or if you'd prefer bespoke courses to ensure individuals get the best value from the software, we have training courses to suit your particular requirements.

Consultancy

Should you require help to plan and implement your GRC management solution, we are able to offer consultation whatever the size of your business.

For large organizations we provide consultation to ensure your GRC solution works seamlessly between countries and departments to give senior management the information they need, whenever they need it.

Standards

Standards evolve and new standards are created which means it's important your business employs an adaptable software solution that's not only intuitive to use but scalable too.

Our products and services are continually adapting to meet the demands of the rapidly changing compliance landscape.

Compliance

How you choose to approach compliance will have a significant impact on the costs involved. Choosing the right system now can mean substantial savings in terms of time and money.

Proteus Enterprise has been developed to help your organization achieve compliance quickly and remain compliant as standards evolve.

The most popular standards supported by Proteus Enterprise include:

- ISO 27001
- BS 25999 (ISO 22301)
- ISO 9001
- ISO 14001
- ISO 20000
- PCI DSS
- COBIT

About InfoGov

Established in 2004, InfoGov is the only UK-based company offering IT risk and compliance, business continuity and vendor risk/compliance solutions. Highly experienced in serving global organizations, we are in an ideal position to understand the issues and the solutions that large and geographically spread organizations need in order to operate effectively.

InfoGov's Proteus Enterprise solution has evolved to help businesses manage their complex and often time-consuming GRC requirements, ensuring our customers have all the information they need to limit risk, ensure compliance and better manage governance.

InfoGov is the founding software partner of the iGRC Consortium - a UK government-funded Technology Strategy Board and South East England Development Agency programme to develop and demonstrate an information protection system capable of being scaled and deployed as a practical application. The outcome will be a technically proven and tested iGRC framework and system.
